## PROFILE

Two years ago, I transitioned into tech with a bootcamp at Le Réacteur, France. Since then, I've honed my skills at Ninja Partners and through freelance work. Now, I'm seeking a stable role in the tech industry.

### Full Stack developer for Ninja Partners | 2021 - 2023

- Developed and launched a Gamification Dashboard to reward the team and collect data, with Appsync, Amplify GraphQL, Iam/Cognito, Lambdas, React and NodeJs
- Enhancing efficiency and accessibility of the data base, back office, with Airtable script (Javascript extension)
- Automated data import processes from Reply.io/Woodpecker APIs etc..
- Conducted comprehensive database analysis, identifying key areas for optimization and system improvements.

## TRAINING & EDUCATION

### BOOTCAMP LE RÉACTEUR | 2021 [www.lereacteur.io](http://www.lereacteur.io)

What I have learnt there :

- Transformed designs into functional website or mobile application
- Developed and secured servers and APIs
- Implemented user authentication and online payment systems
- Executed deployment of projects to hosting platforms
- Manage complex database systems
- Utilised advanced geolocation tools
- Create a content upload system on a server
- Automated tasks like scraping and email dispatch

### BE in Electronic Engineering and Industrial Computing | 2010

## PASSION PROJECTS

- Music project with my wife [HERE](#)
