PROFILE

Sawadikup, after a vocational retraining at Le Réacteur about one and half year ago in France, and my first company experience at Ninja's, I'm looking for new challenges

LIFE AS A DEVELOPER

Front end & Back end Developer @ Ninja Partners | 2021 - Now

- Re-organising data base, back office, with Airtable script (Javascript extension)
- importing data from Reply.io/Woodpecker etc..
- data base analysis
- Gamification Dashboard to reward the team and collect data ,Built with Appsync GraphQl, React and NodeJs

Bootcamp experience @ Le Réacteur | March 2021

- Various projects front end as well as full stack
- Replica of Sixt.fr, made with React and NodeJS
- Personal Mobile project, replica of "Happy Cow" app with React Native & Expo
- Replica of Vinted.com, full stack project made with MongoDB, Express, React, Node.js
- Making of Marvel's Api, mostly React project full stack project & M.E.R.N.
- Front page of Tripadvisor.fr made with HTML and CSS

LIFE BEFORE BEING A DEVELOPER

- Organizing tours in the south of France till covid
- Yoga and Party clothes design - *Bali* - www.olibabadesign.mystrikingly.com
- 3 years in the tourism industry - *north of Europe*

TRAINING & EDUCATION

BOOTCAMP LE RÉACTEUR   www.lereacteur.io
What I have learnt there :

- Convert a design to a website or mobile application
- Create servers, APIs and secure data
- Deploy the creations to a host
- Manage complex database systems
- Use advanced geolocation tools
- Authenticate users, manage online payment
- Create a content upload system on a server
- Automate tasks (scraping, sending emails, etc.)
- Understand the concepts of programming in the broad sense

BE in Electronic Engineering and Industrial Computing

PASSION PROJECTS

- Music project with my wife HERE
